Applicant's arguments filed 4-3-03 have been fully considered but they are not persuasive.

All rejections of applicants' claims under 35 USC 112 are withdrawn in light of applicants' amendments. The following rejection is maintained.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-65 are rejected under 35 U.S.C. 103(a) as being unpatentable over Falke et al.(6,316,514) in view of Hawker et al.(6,114,458).

Falke et al. discloses the preparation of polyurethane foams prepared from isocyanates, polyols, blowing agents, and other additives and modifier (see the entire document). Falke et al. differs in that it does not employ the dendritic macromolecules identified by applicants' claims as an additional component. However, Hawker et al. discloses the employment of the dendritic macromolecules of applicants' claims in urethane foam synthesis for the purpose of imparting their viscosity modifying effect

(see column 7 lines 56 et seq., and claim 16, as well as, the entire document).

Accordingly, it would have been obvious for one having ordinary skill in the art to have utilized the dendritic macromolecules of Hawker et al. in the polyurethane foam preparations of Falke et al. for the desired effect of imparting viscosity modification to the reactive mixtures in order to arrive at the compositions and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

Rejection is maintained for all of the reasons set forth above. Applicants' arguments have been considered, but are not persuasive of patentability. While the paragraph number 23 adequately defines "dendritic macromolecule" sufficiently allow for it to be used as a claim limitation, it is not seen that its employment is limiting of the claims to the sub-group of dendritic macromolecules discussed in paragraph number 24. Accordingly, examiner's rejection is maintained as proper, and applicants' showing of results is not commensurate in scope with the scope of the claims as they currently stand.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
